EXPERIENCE

Freelancing, Timișoara — Junior Website Developer, Junior Manual Software Tester

June 2019 - PRESENT

Involved in several projects, both as a mobile (iOS and Android) application tester and a web app developer.

Building a trading platform for a US based ticket reseller using React Native and React (UI).

Applied agile methodologies, creating test cases against the user stories and acceptance criteria. Was in constant communication with the clients on their application needs.

Manual testing of several mobile and web applications. Created bug reports in Jira for defect tracking.

Involved in the HTML & CSS redesign of a webpage. Also added site tracking using Google Analytics and Google Tag Manager.

Banat IT, Timișoara — Event Manager

May 2019 - September 2019

Overseeing all aspects of event planning for the IT community.

This work ranges from starting new projects, finding new sponsors, creating events and publicizing these events through printed materials, electronic and online media.

I also was involved in creating the website for some of these events (HTML & CSS).

Ran Facebook ads campaigns, experience with Facebook Analytics.

Organized several IOT and Big Data meetups. Part of the core organizing team for HackTalks and RevoJs.

Cmed Research, Timișoara — Database Programmer in Clinical Research

June 2018 - May 2019

Programming of clinical trial databases (screen design, visit definition and validation programming).

SKILLS

Web: HTML, CSS, Javascript, React(Hooks).

Database programming.

Manual testing.

Agile methodologies.

Facebook ads, Facebook & Google Analytics, Google Tag Manager.

Independent and fast learner.

Self-management.

Attention to details.

Ability to work under pressure and handle multiple tasks simultaneously.

Results oriented.

Ability to follow and meet deadlines.

Great sense of adaptability and flexibility.

Coaching and mentoring skills.

Team player - ability to work very well in a team.

Public speaking.

Decide on the structure of the database in order to meet trial requirements and ensure database performance while programming complex queries. Manage client expectations and develop Cmed and/or sponsor standards to allow swift and accurate database programming. Provide mentorship to new joiners.

Cmed Research, Timișoara — *Medical Statistician in Clinical Research*

September 2016 - June 2018

Perform quality assessments, including Dataset Quality Review, End of Study Quality Control, Local Lab data handling, User Acceptance Testing and SAS UAT Quality assurance.

Entry and verification of clinical data into the clinical trial database, ensuring consistency and completeness of data, in accordance with Standard Operating Procedures and Cmed's contractual obligations.

SC Recensio Nobilis, Timișoara — *Data Entry Operator*

September 2014 - August 2016

Manage effectively large amounts of media information, record data by operating data entry equipment and using special software.

Liaison between the development team in Italy and the Romanian team for all aspects of tool improvement.

Product Manager attributions, making sure that the data entry pipeline was appropriately covered.

PERSONAL DEVELOPMENT

Computer programming skills — *Self taught*

Passionate about technology, I started learning web development two years ago. This has allowed me to switch to a more technical position within Cmed, where I would program databases for clinical trials.

Employee Representative — *Cmed Research, Timișoara (Employee Consultation Forum)*

Propose and drive change initiatives after consulting employees.

Historical Street Celebration— *Mercy, Timișoara (Project Team member); Augustin Pacha, Timișoara (Project Team member)*

This event laid out the foundation for making the Mercy street the first pedestrian-only in Timișoara's Union square. Organizing the event involved convincing the local authorities to ban parking on Mercy street in order to make people aware of the beauty of the street without cars. The event draw a bigger audience than expected, which meant we had to find resources to accommodate the extra people that participated in the event.

As a result of the event, Mercy was declared a pedestrian-only street. One year later, we organized a similar to make Augustin Pacha a pedestrian-only street, too. This was successful and at this moment the whole of Timișoara's Union square streets are pedestrian-only.

My role was to discuss with the local authorities (Timișoara's mayor), plan the events for the celebration, make sure that everything is according to the schedule and invite people to the event.

Book Launch— *Provizorat by Gabriela Adameșteanu, Timișoara (PR)*

Book the event location and design and distribute the posters for promoting the event.

LIT 55— *55 years since Faculty of Letters, Theology and History was established, Timișoara (PR, Project Team member)*

Plan and coordinate the event, secure the event location.

Roma people emancipation, a step towards modernizing Romania— *West University, Timișoara (Project Team member, Public Speaker)*

Speaker on the presence of Roma people in the Romanian literature. Help plan the event.

Mapping and Dismantling Day to Day Stereotypes— *Hungary-Romania project, Timișoara (Participant)*

Cross border project which involved participation in different workshops on the topic of addressing stereotypes.

DIGITAL SKILLS

Web development: HTML, CSS – advanced
